W-LAN 802.11 a/b/g Savvi™ Ceramic Antennas

2.4 ~ 2.5 GHz and 4.9 ~ 5.8GHz

Ethertronics' Savvi series of Isolated Magnetic Dipole™ (IMD) antennas deliver on the key needs of device designers for higher functionality and performance in smaller/thinner designs. These innovative antennas provide compelling advantages for 2.4GHz and 5.8GHz enabled handheld devices, medical players and other mobile devices.

Real-World Performance and Implementation

Ceramic antennas may look alike on the outside, but the difference is inside. Other antennas may contain simple PiFA or monopole designs that interact with their surroundings, complicating layout or changing performance with use position. Ethertronics' antennas utilize patented IMD technology to deliver a unique size and performance combination.

Greater Flexibility

Ethertronics' first-in-class IMD technology enables you to develop concept designs that are more advanced and that deliver superior performance in reception critical applications.
